Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 7-9, drawn to toilet, classified in class 004, subclass 420.
- II. Claim 10, drawn to a system for hanging a toilet, classified in class 004, subclass 252.2.
- III. Claims 11-16, drawn to flush valve, classified in class 004, subclass 378.
- IV. Claim 17, drawn to a flushing mechanism, classified in class 004, subclass 378.
- V. Claims 18-20, drawn to a floor anchor, classified in class 004, subclass 252.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I,III and II,IV,V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each can be used in the absence of the other has. See MPEP § 806.05(d).

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the ball etc. is not required by the former. The subcombination has separate utility such as absent the particulars of claim 1.

Art Unit: 3751

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Group, restriction for examination purposes as indicated is proper.
